

Disposable footbath and handbath liner with or without herbal scents.

"Sani Foot Liner" "Sani Nail Liner"

5 by Karin Maihart and Yvonne Spence

FIELD OF THE INVENTION

10 The invention is directed to disposable, waterproof foot and hand bath liners.

SUMMARY OF THE INVENTION

15 This invention relates to new and useful improvements in sanitary inserts for the beauty industry but not limited to; beauty suppliers, cosmetology schools, hotels, spas, retreats, cruise ships, hospitals and everyday household use.

BRIEF DESCRIPTION OF THE FIGURES

20

Figure 1 is a photograph showing an embodiment of the sheath of the invention covering a hand bowl.

25 Figure 2 is a photograph showing a sheath covering the handbowl without water and how a hand would fit the covered bowl.

Figure 3 is a photograph showing a sheath covering a hand bowl with a hand immersed in fluid.

Figure 4 is a photograph showing a footbath without a sheath.

5

Figure 5 is a photograph showing a footbath with its inner portion covered with a sheath of the invention.

Figure 6 is a photograph showing feet immersed in fluid in the sheath-covered footbath.

10

DETAILED DESCRIPTION OF THE INVENTION

The present invention generally relates to a footbath and hand/finger and nail bowl sheath/insert/liner for placement within footbaths and/or nail and finger bowls especially footbaths with a motors which carry germs. The insert which is disposable and can be replaced after a single use provides a sanitary condition and will eliminate infection, disease, germs and fungus that typically spreads as a result of multiple use by multiple users of a foot bath or hand bowl.

20

The disposable sheath can be scented or unscented. Further, it allows clean water to fill the container without exposing the water or a person's nails or feet to an unsanitary condition.

5 The sheath/insert/liner is a single sheath/sheet of thin yet tough, flexible, waterproof, material (typically plastic) that may be of any suitable or desirable shape and size and specifically fits the general contour as the inner contour of the footbath and/or a nail and finger bowl.

10 The depth of the insert will depend on the area and width -greater or lessor for expansion of the sheath/insert/liner.

As an example the depth of the footbath is deeper that that of

The finger/nail bowl. For example, a sheath for a foot bath may measure

15 14"wide x 16"deep x 8"high, or 13"wide x 15"deep x 6" high Additionally, in accordance with the invention a sheath for a hand bowl may measure 4 1/2"wide x 6"long x 2" high. However, since bowls and baths may differ in size a sheath of any size can be constructed and will be encompassed by the invention.

20

While the securing of the edges of this sheath/insert/liner may be accomplished in various ways. We have here by shown one particular way of doing it and that is by using elastic as shown in Figures 1-6.

The walls of the sheath/insert/liner preferably should snugly conform or adhere to the sides of the footbath or finger and nail bowl

5 The inside of the sheath/insert/liner can be part of kit that includes a pouch having herbs, salts, or oils to be used during the foot/hand treatment. The pouch can include tear off tabs allowing the herbal scents/salts/oils to dissipate in the water.

10 The edges of the footbath are ready to receive water as shown in Figures 4-6.

In addition, the sheath/insert/liner may have not restricted to a saying or a hotel name written on them.

15 After all, we only have 10 fingers and 10 toes...and we need those!

The previous description is provided to assist one of ordinary skill in making and using the invention. The descriptions above are not intended in any way to otherwise limit the scope of the disclosure of the protection granted by

20 Letters Patent granted hereon.
